NIJEDEE GROUP

Platform Blueprint Property Maintenance, Marketplace & Facility Management

A complete map of the NIJEDEE web platform — every module, user flow and business capability, prepared for developers building it and investors backing it.

NIJEDEE.com.ng

Lagos, Nigeria — Lekki · Ajah · Badore · Sangotedo

Prepared August 2026

How This Document Works

This blueprint documents the full NIJEDEE web platform — the site map, every customer-facing module, and the underlying business model. It is written for two audiences at once.

FOR DEVELOPERS

- Full site map & page inventory
- Every module's data fields & user flows
- Booking, shop, and artisan-network logic
- Account, search & dashboard requirements

FOR INVESTORS

- The business model in one page
- Revenue streams across 4 platform pillars
- Market: Lagos property-services demand
- Growth path from services to marketplace

01 · Executive Summary

NIJEDEE is a technology-driven property maintenance, repair, cleaning, facility management and property marketplace company serving homeowners, tenants, landlords, businesses and property managers across Lagos, with primary coverage in Lekki, Ajah, Badore and Sangotedo.

From fixing a leaking pipe and servicing an AC unit, to deep cleaning, painting, buying building materials and managing an entire property, NIJEDEE brings property services into one platform — reducing the friction, risk and guesswork customers currently face when sourcing trustworthy artisans and materials.

13	4	4+	2-WK
Service Categories	Platform Pillars	Lagos Zones Covered	Academy Training Cycle

The Opportunity

Property problems in Lagos are stressful: finding a trustworthy artisan, getting a fair price, sourcing materials, and supervising repairs each currently require separate, unreliable channels. NIJEDEE consolidates these into one trusted platform — a strategy that mirrors successful home-services marketplaces globally, adapted to the realities and trust deficit of the Nigerian informal artisan economy.

Four Pillars, One Platform

Services	On-demand booking of 13 categories of home and office repair, maintenance and cleaning work, delivered by verified professionals.
Marketplace	NIJEDEE Shop for building materials, paints, tools and property products — with cart, checkout and delivery tracking.
Properties	Shortlets, rentals, sales listings and full property management for landlords and property owners.
People	A two-sided artisan network plus the Vocational Skills Academy — training the next generation of verified professionals.

02 · Platform Architecture

Recommended top navigation (10 content areas condensed for usability):

Home	Services	Book a Service	Shop	Properties	Find an Artisan	More ▾	Account

Grouped under More ▾: Become an Artisan · Training Academy · About Us · Contact · Help & Support. "Book a Service" is treated as the primary conversion button site-wide.

Full Site Map

#	Section	Core Contents
1	Home	Hero, value props, service grid, how-it-works, CTA
2	Services	13 category pages, each with full service list + booking CTA
3	Book a Service	Multi-step booking form + confirmation flow
4	Shop	Product catalogue, product page, cart, checkout, order tracking
5	Properties	Shortlets, rentals, sales, owner submission, property management
6	Find an Artisan	Artisan directory, profile pages, ratings & verification
7	Become an Artisan	Artisan registration & application flow
8	Training Academy	Vocational programme info + registration
9	About Us	Mission, vision, ecosystem overview
10	Contact	Support channels, service-area map, contact form

03 · Module 1 — Home & Discovery

The landing experience establishing trust and directing users to their next action.

Hero Message

"Your Property. Our Responsibility."

NIJEDEE is a technology-driven property maintenance, repair, cleaning, facility management and property marketplace company serving homeowners, tenants, landlords, businesses and property managers across Lagos.

Primary buttons: Book a Service · Explore Services · Shop Building Materials

Why Choose NIJEDEE — Value Propositions

Trusted Professionals

Connect with trained and verified artisans and service professionals.

Convenient Home Service

Book services and have the team come to your home, office or property.

One Platform for Everything

Maintenance, repairs, cleaning, painting, materials and artisans in one place.

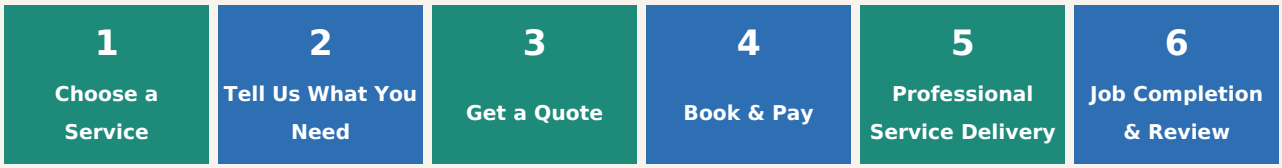

Transparent Pricing

Clear service information and quotations before work begins.

Quality Workmanship

Professional delivery, customer satisfaction and proper job completion.

How NIJEDEE Works — 6-Step Flow

04 · Module 2 — Services Catalogue

13 categories power the core booking engine. Each has a dedicated page, service list, and “Book [Service]” CTA.

Category	What's Included
Plumbing	Leak repairs · Blocked drains · Toilet & pipe repairs · Water tank & pump install · Bathroom/kitchen plumbing
Electrical	Fault diagnosis · Socket/switch/lighting install · Wiring · Generator connections · Distribution boards
AC Installation & Maintenance	Installation & servicing · Cleaning & gas refill · Leak detection · Compressor services · Preventive maintenance
Painting & Decoration	Interior/exterior painting · Wall prep & screeding · Texture finishing · Commercial painting
Cleaning Services	Regular & deep cleaning · Move-in/move-out · Post-construction · Office/kitchen/bathroom · Laundry & upholstery
Fumigation & Pest Control	General fumigation · Cockroach/bedbug/mosquito control · Pest inspection · Preventive treatment
Carpentry & Furniture	Wardrobes & cabinets · Beds, TV consoles, shelves · Office furniture · Custom furniture & repairs
POP, Tiling & Interior	POP ceiling · Wall screeding & panels · Floor/wall tiling · Interior decoration
CCTV & Security	Installation & maintenance · Camera replacement · Remote monitoring setup
Solar & Inverter	Solar/inverter installation · Battery installation · System maintenance & assessment
Facility Management	Routine inspections · Preventive maintenance · Vendor/artisan management · Property reporting

05 · Module 3 — Booking Engine

The core conversion flow. Developers should treat this as the platform's primary transactional path.

Booking Form — Data Model

Field Group	Captured Data
Customer Info	Full name · Phone · WhatsApp · Email
Property Info	Type (Apartment/House/Office/Shop/Estate/Commercial/Other)
Location	Estate/Street · Area · Landmark
Service Required	Select from 13 categories
Problem Description	Free text — customer explains the issue
Media Upload	Photos/videos of the problem
Scheduling	Preferred date & time

Confirmation Logic

On submit, the customer sees: “Your service request has been received. A NIJEDEE representative will contact you to confirm the details, pricing and appointment.”

This should be backed by automated confirmation via WhatsApp, SMS or email — the booking record then enters the operations queue for pricing/inspection and artisan assignment.

06 · Module 4 — NIJEDEE Shop

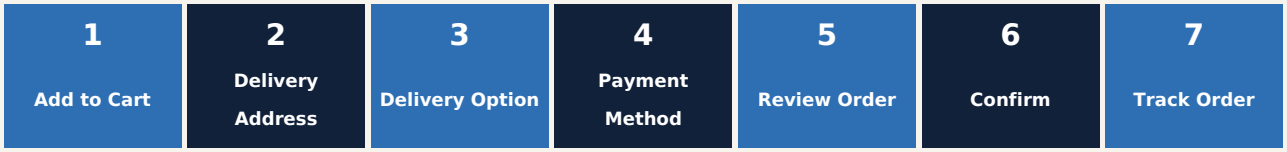

An e-commerce layer that monetises materials demand generated by the services business.

Category	What's Included
Nijedee Paints	Emulsion · Matt Emulsion · Higher Satin · Other paint products
Building Materials	Cement · Tiles · Plumbing/electrical materials · POP materials · Accessories
Tools & Equipment	Plumbing/electrical tools · Painting tools · Cleaning & construction equipment
Property Products	Cleaning products · Security products · Solar products · Home improvement

Product Page — Required Fields

Product name · Images · Price · Description · Available quantity · Specifications · Delivery information — with Add to Cart, Buy Now and WhatsApp to Order actions.

Checkout Flow

07 · Module 5 — Properties

Find, rent, sell or manage properties — extending NIJEDEE from services into real estate.

Category	What's Included
Shortlet Apartments	Short-stay bookings for trips, holidays, events
Properties for Rent	Residential & commercial listings
Properties for Sale	Purchase listings
Property Owners	Submit properties for listing & management
Property Management	Inspections · Maintenance · Cleaning · Repairs · Tenant support · Routine checks

Listing Data Model

Photos · Location · Price · Number of bedrooms · Amenities · Availability · House rules · Contact/booking button.

Strategic note: Properties is the module that converts NIJEDEE from a maintenance company into a full property-services marketplace — the same customer who books a shortlet may become a Facility Management client, and every managed property is a recurring source of service bookings.

08 · Modules 6 & 7 — Artisan Network

A two-sided marketplace: customers find verified artisans; artisans find consistent work.

FIND AN ARTISAN

10 categories: Plumbers, Electricians, AC Techs, Painters,

Carpenters, Tilers, POP Installers, Cleaners,

CCTV Techs, Solar Techs

Profile fields: Name, photo, skill, location,

years of experience, services, verification status,

ratings, reviews, completed jobs, price, availability

BECOME AN ARTISAN

Benefits: More jobs, profile building,

reputation via reviews, business opportunities,

training access

Registration fields: Name, phone, WhatsApp,

location, skill, experience, previous work,

identification, references, work photos/videos

Trust & Safety

NIJEDEE verifies artisans before allowing them to operate on the platform. Customers can report problems, rate artisans and submit reviews after every completed job — the verification layer is the core trust differentiator versus informal, unverified artisan sourcing.

09 · Module 8 — Vocational Skills Academy

Empowering young minds with practical skills for employment, entrepreneurship and self-reliance.

The NIJEDEE Vocational Skills & Entrepreneurship Academy provides practical training designed to help young people develop technical and entrepreneurial skills — and feeds directly into the artisan network, creating a homegrown pipeline of verified professionals.

Training Areas

- Plumbing
- Electrical Installation & Maintenance
- House Painting & Finishing
- AC Installation & Maintenance
- AC Gas Filling
- Furniture Making
- Interior Installation
- Cleaning Services
- Marketing
- Sales
- Business Development

Who Can Join

Secondary school students · School leavers · Undergraduates · Young entrepreneurs · Anyone interested in practical skills.

What Students Gain

Practical training, hands-on experience and business knowledge to pursue employment, start a business, or work as independent professionals.

10 · Account, Search & Footer

Cross-cutting platform features that support every module above.

Customer Dashboard

- View profile
- Book services
- Track bookings
- View booking history
- Track orders
- View invoices
- Save addresses
- Save favourite services
- Manage payments
- View property information
- Rate completed jobs
- Contact support

Site Search

Search Type	Example Query
Services	“AC servicing”, “plumber”, “deep cleaning”
Products	“Paint”, “cement”, “tiles”, “inverter”
Artisans	“Electrician near me”
Properties	“2 bedroom shortlet in Ajah”

Footer Structure

Group	Links
NIJEDEE	About Us · Our Services · Contact Us · Careers · Become an Artisan · Training Academy
Customer	Book a Service · My Account · My Bookings · My Orders · Help & Support
Marketplace	Shop · Find an Artisan · Properties · Shortlets · List Your Property
Legal	Terms & Conditions · Privacy Policy · Refund Policy · Cancellation Policy · Artisan Terms · Delivery Policy

11 · Investor View — Business Model

How the platform's modules translate into revenue.

Revenue Stream	Mechanism
Services (core)	Commission or margin on 13 booked service categories, priced per job after inspection/quote.
Shop (marketplace)	Retail margin on building materials, Nijedee-branded paints, tools and property products.
Properties	Booking fees on shortlets, listing/agency fees on rentals & sales, recurring facility-management contracts.
Artisan Network	Lead-generation or subscription fees from verified artisans; premium placement in the directory.
Academy	Programme fees from the two-week vocational training cycle; graduates feed the artisan supply pipeline.

Why This Model Compounds

Each pillar reinforces the others. A services customer becomes a shop customer buying materials for the same job. A shortlet guest may become a long-term property client. A facility-management contract generates recurring service bookings. Every completed job trains the ratings data that makes the artisan network more trustworthy — and the Academy supplies the verified workforce that scales the whole system without relying purely on the existing informal artisan market.

Market Context

NIJEDEE currently serves Lekki, Ajah, Badore and Sangotedo, with other parts of Lagos served by arrangement — a dense, fast-growing corridor of new residential and commercial development where reliable, verified property services are in persistent short supply.
